## **ALERT- Private Company Soliciting Water Treatment Products and Water Sampling**

December 8, 2015 (The Blue Mountains, Ontario) – Town Staff have been made aware of a private company that is going door-to-door soliciting water treatment equipment for residential use. The Town wishes to assure residents that companies of this nature are not endorsed by the Town and the Town cannot verify the authenticity of the products.

Recently, reports have surfaced in neighbouring municipalities about a private company soliciting residents to have their water tested. This solicitation is being undertaken by an independent, private business. This is not a Town led initiative.

The Town wishes to assure its residents that the Town's water meets and exceeds the regulations for water treatment and distribution quality as provincially legislated and overseen by the Ministry of the Environment and Climate Change.

Should any Town water user or resident wish to discuss their water quality, they are encouraged to contact the Town at (519) 599-3131.
